

Recommendation Set Three:
Recommendations for changes to or clarification of federal definitions

1. Computer Use: Add a statistic of wireless usage
2. Interlibrary Loan: To change the definition by adding language that excludes items obtained through a set of user sharing libraries sharing the same ILS where the item is obtained via a simple place hold function within that ILS and the patron is part of the user sharing group of libraries.
3. Electronic Resources: to expand the definition to formally include online subscription services such as Tutor.com
4. School/Public Libraries and other combinations that include a public library: to clarify how to count resources and circulation for any situation where a public library shares space and resources with another type of library.
