Re: Climate as a Montana Spatial Data Infrastructure Theme

At their June 18 meeting, the Montana Land Information Council took action on a request from the University of Montana to add Climate as the 15th formally recognized Montana Spatial Data Infrastructure (MSDI) theme. To complete the process the State Librarian must bring this recommendation to the State Library Commission for approval. Please let this memo serve as a request that this be placed as an August 14th agenda item for the Commission's consideration.
