

Suggestions from Talking Book Library (TBL) Staff for 2018-2022 LSTA Plan April 2017

Note: Wording isn't final. This is a draft. These goals received the highest votes from TBL staff. They are in order and start with the vision statement that received the highest number of votes.

Goal: The Talking Book Library partners with other organizations to build upon the work of those organizations and to be a part of technology initiatives that may benefit patrons of the Talking Book Library.

Goal: General public is aware of and has access to Talking Book Library services.

Goal: Patients with visual or physical impairments or reading disabilities know about and have access to Talking Book Library services.

Possible objective (to show how this ties to vision statements): TBL staff will provide outreach and training for occupational therapists; TBL staff will work with institutions that serve the elderly.

Goal: The Talking Book Library sustains current level of service for existing patrons.

Possible objectives: cross-training across all functions; identify our priorities – what must we do; increase the amount of recording that we do.
